Subject: 1215 ASPECT Update 18 April 2013

ASPECT is on station over the site and is reporting ammonia detections SE of the facility. We are looking at the preliminary data and confirm these detections.

The crew reports two active fires and considerable damage in and around the site. Flight conditions are acceptable with a ceiling of 2400 ft AGL. Aerial and oblique images are being collected. The crew reports 4 lines collected.

I will send out a notice once they RTB.

Mark
